

Summit Project Plan

Project Title

Developing an Equity and Excellence Symposium: Getting Better Together

District/ Organization

School District of Baraboo

Project Description

The goal of this project is to provide teachers and administrators with structures and strategies to remove barriers to student success. Strategies will be shared in a conference that will convene practitioners successful in their work towards equity.

The conference would provide a venue to share success stories and provide access to effective tools to support meaningful change in districts. The desired outcome of this project is to lead a conference that is well-organized, well-attended, and engages community members and a diverse representation of educational professionals in the work of equity for all students.
